

# USER REPORT

Vent stacks are required to be a specific height above the roof. Unfortunately, when thicker or extra insulation is added to meet R-Value requirements, the vent stack is often left out of compliance. When that happens, nothing is faster, easier, or cheaper than a Tubos Vent Stack Extension. We offer a full line of schedule 40 PVC vent stack extensions to meet standard 2-, 3-, 4- and 5-inch diameter cast-iron and PVC vent stacks. The patented design features an internal splice sleeve that fits into the existing vent stack to ensure that moisture cannot penetrate the roofing assembly. And each 28-inch unit can be cut and used for two extensions. Just measure, cut, and seal in place with caulk to meet code! It's no wonder that so many great companies and organizations already use Tubos Vent Pipe Extensions on their roofs!

## **RETAIL**

Aldi  
Walgreens  
The Home Depot  
Dick's Sporting Goods  
Macy's  
Walmart  
Public  
Westfield Mall
